### **DETAILED ACTION**

Receipt is acknowledged of the request for continued prosecution, claim, amendments, and information disclosure statement filed 05/05/2005.

Applicant has requested rejoined of the no-elected claims. However, the claims as amended are not considered allowable (as will be explained in the action that follows). Further, even if they were, application would have to elect another structure for search purposes, since searching all the structures of these claims would entail an undue burden on this office.

The following rejection is maintained in this action:

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 2-23, 28, 36-38, 40, 43-44 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Wen et al.

Wen et al disclose a biocompatible polymer having phosphate-based linkages and one or more radiosensitizers (see introduction as well as materials and methods).

Art Unit: 1615

The composition may have up to 25% loading level, and may be in the form of microspheres (see page 66, column 2, paragraph 3). Delivery may be for a period of about 50 days (see Figure 1). The limitation to subsequent treatment with electromagnetic radiation is viewed as an intended use since applicant is claiming a composition, not a treatment. Further, limitations drawn to the reduction in doubling time, inhibition of neoplasm by reduction in volume, therapeutic index and ED50 are considered inherent properties of the same biocompatible polymer containing radiosensitizers as disclosed by Wen et al. The instant claims are anticipated by Wen et al.

Claims 24-27 are objected to as dependent upon a rejected base claim.
